1. Overview

Overview of a Cargo Theft Electronic Data Submission

Cargo Theft statistical reporting data may be submitted to the FBI via: (1) the National Incident-Based Reporting System (NIBRS), (2) Cargo Theft Incident Report, and (3) Cargo Theft Electronic Data Submission. The Cargo Theft Electronic Data Submission is created using a detailed record layout. It should be noted that attempted Cargo Theft is not collected in this program.

This manual addresses the Cargo Theft Electronic Data Submission.

After processing the Cargo Theft data, an error list is created and returned to the participant.

Manual Overview

Section 1 is a general overview of a Cargo Theft Electronic Data Submission.

Section 2 is a general record layout specification for a Cargo Theft Electronic Data Submission.

Section 3 is a detailed record layout specification for a Cargo Theft Electronic Data Submission, which includes field formats, data validation rules, and error messages for each field.

Section 4 describes error reporting for a Cargo Theft Electronic Data Submission.

Section 5 is a numerically-ordered listing of all possible error messages for a Cargo Theft Electronic Data Submission along with the name of the field in error.

2. General Record Layout

Record Layout for a Cargo Theft Electronic Data Submission

Cargo Theft records on a Cargo Theft Electronic Data Submission must have the file layout as specified.

The Cargo Theft Electronic Data Submission must be submitted as a standard ASCII text file.

Each record on a Cargo Theft Electronic Data Submission must first be initialized to BLANKS before data are moved into the applicable fields. This will provide “filler” for those varying Data Elements, which do not have data because of the circumstances of the request.

4. Error Reporting

Overview of Cargo Theft Error Reporting

A Cargo Theft Electronic Data Submission is validated during the upload process, and any data in error are rejected. Data in error for a Cargo Theft Electronic Data Submission are placed in an error file and forwarded to the appropriate contact.

Error Report for a Cargo Theft Electronic Data Submission

For a Cargo Theft Electronic Data Submission, the error file will be created during the uploading of the data file. The error file is also a standard ASCII text file. Upon successful completion of the upload process, this file will always contain at least one or more records, where the last record in the file will indicate that the uploaded data file was processed in its entirety (see Figure 1).

Error Record Layout for a Cargo Theft Electronic Data Submission

Each record in the file will have the layout as specified in Figure 2.

057	INCIDENT ALREADY ON FILE FOR RECORD TYPE I An incident report was previously added to the FBI's Cargo Theft database and is presently on file. Another incident was processed with the same ORI Number and Incident Number, resulting in this error.
090	MUST BE ENTERED WHEN REPORT TYPE IS Z When Report Type is Z, Zero Report Date must be entered.
093	CANNOT BE ENTERED WHEN REPORT TYPE IS NOT Z Zero Report Date can only be entered when Report Type is Z.
